

Technical Assistant/Laboratory Technician (m/f/d) for Drug Discovery

ID 2025-02

At 2bind GmbH, we are experts in biophysics specializing in drug discovery and antibody development. Our mission is to provide high-quality research for our clients in the biotech and pharmaceutical industries, driving innovation in the life sciences. Join our specialized team and work on exciting research projects in a collaborative and supportive environment. We will support you from day one in building the technical knowledge you need, and we are looking for open-minded individuals who work collaboratively, are self-motivated, and take responsibility for their work.

Your Tasks and Responsibilities

- Perform binding assays in low- and high-throughput formats on our TRIC-, MST-, Spectral Shift-, and ITC-platform to generate high-quality data.
- Operate and maintain TRIC, MST, Spectral Shift, and ITC instruments, ensuring optimal performance.
- Collaborate with experienced scientists and project managers to achieve project goals while adhering to quality standards.
- Maintain accurate digital records of all experiments conducted.
- Support general laboratory activities to ensure smooth operations.

Your Profile

- Preferably, a completed apprenticeship in molecular biology, biochemistry, biotechnology, or a related field with hands-on laboratory experience.
- Alternatively, a B.Sc. degree in molecular biology, biochemistry, biotechnology, or a related field.
- Experience with binding assays (e.g. ELISA, MST) is an advantage but not a requirement.
- Enthusiasm for learning new techniques and technologies.
- Excellent documentation skills to ensure data integrity, reproducibility, and quality.
- Good knowledge of common Microsoft applications (e.g., Word, Excel, PowerPoint).
- Strong verbal and written communication skills and excellent interpersonal skills. Basic English skills are required as experiment and project documentation are conducted in English.

What we Offer

- An inspiring and supportive work environment in a growing company based in Regensburg.
- Opportunities for professional development and learning new technologies.
- The chance to work on exciting projects that make a difference in drug discovery and antibody development.
- A young and motivated team that values innovation and collaboration.

How to Apply

Send your resume and a short cover letter to careers@2bind.com with the subject line: "**Application: ID 2025-02, Technical Assistant/Laboratory Technician**".

We believe that technical skills can be learned – we are looking for motivated individuals who work collaboratively and independently, so don't hesitate to apply. Applications are reviewed on a rolling basis – don't wait to reach out!

We look forward to your application!
